Introduction

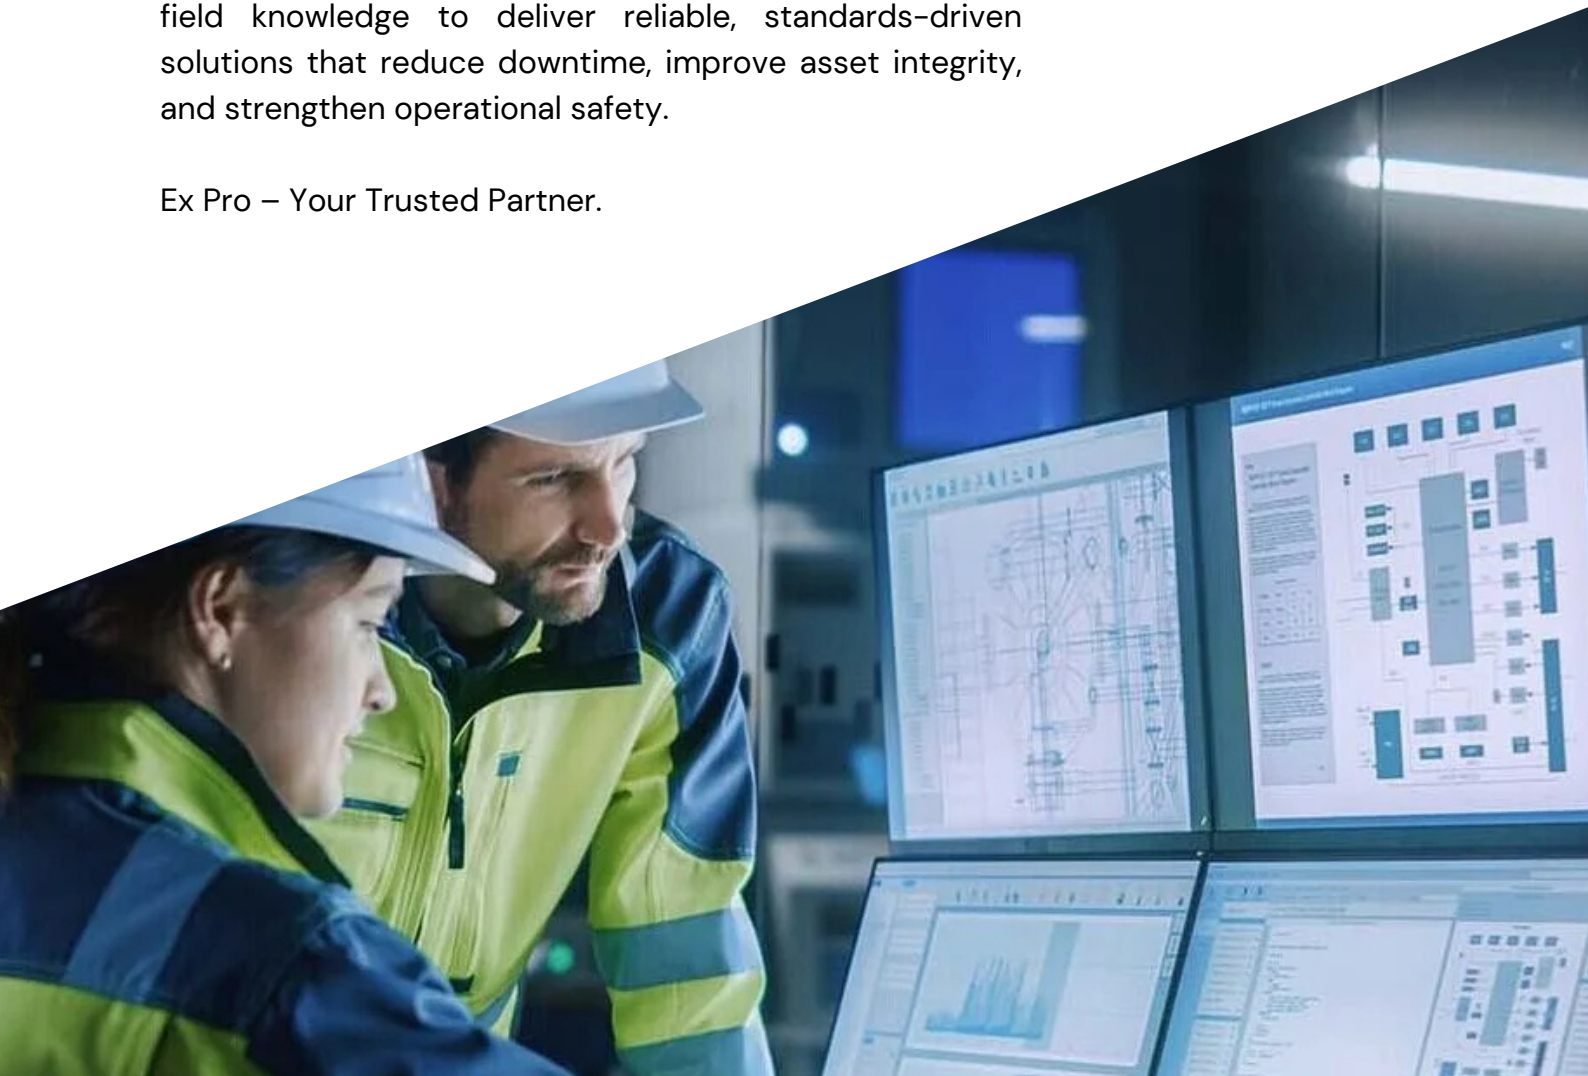

Ex Pro is a trusted engineering services provider such as and not limited to Ex equipment inspection, thermography surveys, low voltage circuit breakers primary current injection, electrical projects management, and training services to enhance the competencies in the oil and gas industry. With over 18 years of field experience, we specialize in delivering integrated services that ensure compliance, performance, and safety across offshore and onshore drilling environments.

At Ex Pro, we combine technical expertise with practical field knowledge to deliver reliable, standards-driven solutions that reduce downtime, improve asset integrity, and strengthen operational safety.

Ex Pro – Your Trusted Partner.

Mohamed Ahmed
Chairman

Mission and Vision

➔ Mission

At EX PRO, our mission is to provide comprehensive, high-quality oil field services that ensure operational efficiency, safety, and regulatory compliance for our clients.

➔ Vision

Our vision is to expand our footprint in the oil and gas sector by positioning ourselves as the go-to provider of petroleum facilities needs either spare parts, maintenance or inspection services

Our Services

➔ Ex Surveys

Our qualified and certified engineering team delivers Rig Equipment Inspections such like Explosion-Protected Equipment Inspections (Ex-surveys) to ensure compliance with hazardous atmospheres requirements in accordance with IEC 60079-14/17.

➔ Circuit Breaker Current Injection

we are expert in low voltage circuit breaker maintenance and periodic testing to ensure proper functioning and electrical protection.

➔ Drilling Rigs Compliance Verification

➔ Electrical Projects Management

➔ Training Solutions & Competency Assessment

➔ Failure analysis and technical support

Our Services

➔ Thermography Survey

Thermal imaging serves as an effective predictive tool that allows us to identify potential faults before they occur, helping to reduce downtime. Our ICT thermographer are experts in capturing and analyzing thermal images.

➔ Electrical Projects Management

Our team has a strong technical background related to building up and upgrading electrical systems for drilling rigs either offshore or onshore.

➔ Drilling Rigs Compliance Verification

➔ Electrical Projects Management

➔ Training Solutions & Competency Assessment

➔ Failure analysis and technical support

Our Services

➔ Training and Development

TTT Ex Pro certified instructor provides comprehensive training programs to maintenance and drilling personnel such like and not limited to: SCR system, VFD system, Top drive, AC generator, Ex Equipment, Thermography, Rig Inspection.

➔ Competency Assessment

OPITO Competency assessors in Ex Pro create assessment standards for each specific job and implement the assessment process in accordance with the OPITO criteria.

➔ Drilling Rigs Compliance Verification

➔ Electrical Projects Management

➔ Training Solutions & Competency Assessment

➔ Failure analysis and technical support

Our Services

➔ Gauges Calibration

Gauge calibration is a critical process that ensures the accuracy and reliability of measurement instruments used in industrial operations. Our calibration services cover a wide range of gauges, including pressure, temperature, and flow instruments, which are essential for maintaining process control, safety, and product quality.

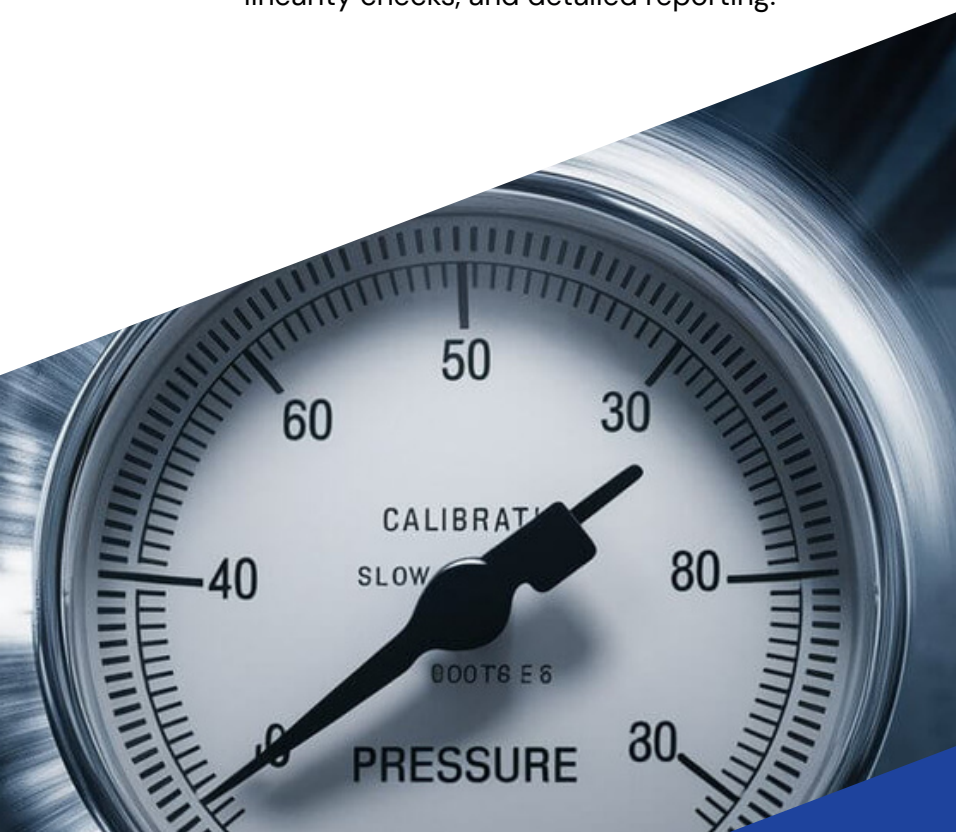

Using a certified testing instrument to ensure measurement integrity and regulatory compliance calibration is carried out in accordance with ISO/IEC 17025 and ANSI/NCSL Z540-1 standards, and includes thorough inspection, zero/span adjustments, linearity checks, and detailed reporting.

➔ Drilling Rigs Compliance Verification

➔ Electrical Projects Management

➔ Training Solutions & Competency Assessment

➔ Failure analysis and technical support

Our Services

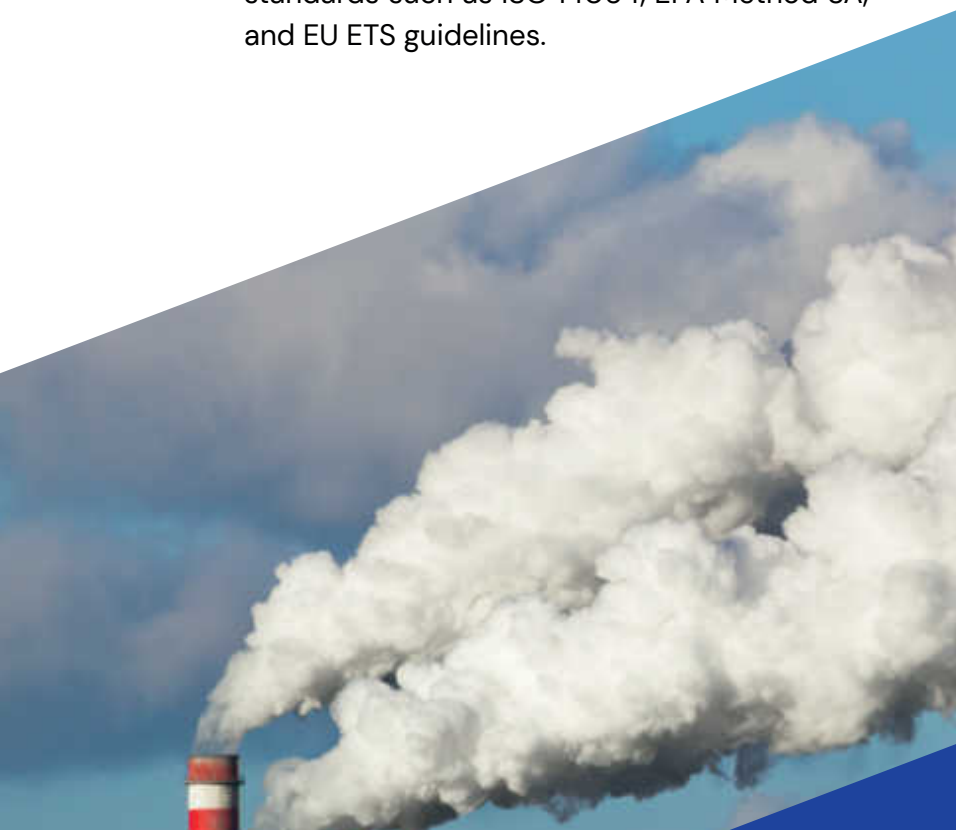

➔ CO2 Emission Measurements

In the oil and gas industry, accurate CO₂ emission measurement is essential for environmental compliance, operational transparency, and sustainable development.

Our CO₂ emission measurement services are designed to help operators monitor, quantify, and manage carbon dioxide emissions generated from combustion processes, flaring, venting, and fuel consumption across upstream and downstream activities.

We utilize advanced gas analyzers and portable emissions monitoring systems (PEMS) in accordance with recognized standards such as ISO 14064, EPA Method 3A, and EU ETS guidelines.

Our Services

➔ Supply Chain Services

Our Supply Chain Services ensure efficient, compliant, and timely procurement of critical equipment, spare parts, and materials for oilfield operations. We specialize in sourcing certified Ex equipment, electrical components, instrumentation, and rig maintenance tools. From vendor selection and technical evaluation to logistics and delivery, we manage the full procurement cycle to minimize downtime and ensure operational continuity.

We ensure quality and compliance through close coordination with QA/QC, delivering reliable, cost-effective support for drilling, maintenance, and HSE operations.

Our Approach

Understanding
Your Business

Creative
Execution

Data-Driven
Optimization

Continuous
Improvement

Our Values

⊕ Ethical

- We uphold the highest standards of integrity, ensuring transparency and honesty in all our business dealings.

⊕ Success

- Your success drives us. We tailor our services to help you achieve your goals and maintain smooth operations.

⊕ Excellence

- We are dedicated to delivering top-quality products and services, continuously striving for improvement and innovation.

⊕ Commitment

- We are fully committed to meeting your needs, providing reliable solutions with a focus on timely delivery and customer satisfaction.

Client Testimonials

Mohamed Sameer
MDC Engineering
Director

"Working with Ex Pro Company has been a game-changer for our business. Their expertise in drilling rig equipment inspection helped us achieve remarkable results regarding compliance, which satisfies our clients' needs."

Mohamed Nazim
ECDC Operations
Director

"Partnering with Ex Pro Company was the best decision we made for our equipment verification and audit. Their thorough experience and professionalism enhanced our maintenance strategies."

Tarek Abd El-aziz
KDC Project Manager

"Their innovative inspection strategy, familiarity with the drilling field and strong technical background are the main reasons that encouraged KDC in Kuwait to cooperate with Ex Pro team."

Mohamed Ebraheem
ADES Egypt
Maintenance Manager

"Ex Pro Technical Team provides low voltage circuit breakers primary current injection as well as other circuit breakers testing and periodic maintenance in a way that reflects their deep knowledge and experience."

Client Onboarding

➔ Introduction Call

- Schedule a call to introduce our team and understand your business needs and goals.

➔ Proposal and Agreement

- Send a detailed proposal outlining the agreed-upon services, timeline, and pricing.

➔ Kickoff Meeting

- Conduct a kickoff meeting to dive deeper into your business, target audience, and marketing goals.

➔ Information Gathering

- Collect all necessary information and access to accounts (social media, website, analytics, etc.).
